**The Hitter** is an asymmetrical core featuring an RG of 2.488, a differential of 0.053, and an intermediate differential of 0.015. The cover is a newly developed formulation called the Utility Cover. This cover showed us the most versatility by matching perfectly with **The Hitter** core. Our tester found **The Hitter** to be strong enough to handle medium to heavy volumes of oil and still yielded a strong continuous motion off the spot.
