The Hitter Pearl is an extension of the very successful Hitter line. The original Hitter used a derivative of the HK22 Solid cover called the Utility cover. **The Hitter Pearl** takes the performance to the next level with the use of this HK22 base called HK22 Utility Pearl. This cover and core combination yields a cleaner motion and a significant increase in backend reaction. Where the original Hitter had more mid-lane motion, **The Hitter Pearl** is cleaner and sharper down-lane, making it a perfect complement to the original Hitter.
